Start your Engines. We're going Back to Indy.

ASM Heat Treating Society 27th Conference and Exposition

September 16-18, 2013 • Indiana Convention Center • Indianapolis, Indiana USA

National Heat Treat/Houston, Texas. Several weeks ago we mentioned about this brand new commercial heat treat in Houston, Texas but below you will find the official press release of the grand opening. In the press release it mentions National as having the largest commercial vacuum furnace in the US Southwest. This can be seen in the second photo below. May 30/2013 **NEW**

"National Heat Treat (NHT) celebrated its official opening of a key facility in Houston, Texas recently. The event showcased NHT's state-of-the-art, 50,000-square-foot, thermal processing plant and infrastructure, including the largest commercial vacuum furnace in the southwest United States. National Heat Treat's (NHT's) opening of its new state-of-the-art facility, joined

by, in order of appearance, Houston Mayor Pro-Tem/City Council Member Ed Gonzalez, Harris County Sheriff Adrian Garcia, seven-time world champion basketball player Robert Horry, in addition to NHT Team Members Mike Kim, Robert Gutierrez and David Veisoh".

"The event marked the completion of another key phase for NHT, with the new Houston facility also housing the highest operating temperature commercial open fire furnace in Texas. Pursuant to NHT's second phase of its 2013 Houston facility rollout, July will also bring the largest commercial batch furnace in Texas. The next two phases will be completed over the next twelve months and involve additional significant investments in technology, equipment, and industry experts, fortifying the company's status as a national leader in the coming years. "We're excited to give customers the opportunity to actually see our capabilities," said Leo Martinez, head of NHT's sales and marketing divisions. "We've dedicated a tremendous amount of resources toward what we believe is the most cutting-edge heat treating operation in this region. Our facility and equipment put us at a unique advantage in serving Texas businesses that may have previously needed to outsource their specialized heat treating needs to entirely different parts of the country. Now they can get it done effectively and efficiently in terms of time and costs, right in their backyard."

Used Equipment Available. Our latest addition is a 36" X 48" X 32" *Batch IQ Line*-an item very hard to find. Also new is a *Guler Ion nitrider with Ammonia Dissociater*, a *Sunbeam Pit Carburizing furnace* in excellent condition, 2 *Rotary Drum Washers*, a *SBS Air Cooled Heat Exchanger* a *Surface Super 30 Line* and a *Surface Super 30 Temper*.
